

Sustainable, secure and socially responsible

**EOL IT Services and London Metropolitan Network, working together in partnership.**

*"I have been using EOL IT Services for over 5 years now and I am very happy with the fast, efficient, friendly service that I always receive, keep up the good work guys!"*

*London Borough of Havering*

Formed in 1996 EOL IT Services is one of the UK's largest independent IT asset refining and data security companies.

EOL is a trusted service provider to many leading organisations in banking, law, financial services, healthcare and the public sector; our reputation is built on:

- Responsible data erasure to exacting CESG standards
- Comprehensive managed services that minimise disruption and risk
- Full accreditation and compliance
- A positive environmental disposal policy
- Quality customer services
- Residual value opportunities for redundant IT equipment

**Protecting your Business**

When it's time to dispose of your IT assets, you face three major challenges:

- Secure removal of all your corporate data
- Maximising the residual value of your equipment
- Compliance with stringent environmental legislation

IT asset disposal should not be treated as a low level task, it must become an integral part of your IT and business strategy. Ensure that you work with a company that understands the contribution effective recycling can make to your corporate health.

Our skilled professionals deliver a managed disposal service that is fully integrated with your roll-out programme.

We ensure that all existing data and forms of identification are fully erased from hard disks, storage media and hardware by using documented, quality-controlled processes that exceed the highest security standards. We have a proven track record with no data losses throughout the company's history.

Finally, we recycle unwanted equipment in line with current legislation. We remarket suitable equipment that has had all data and identification securely removed.

## **Tailored managed services**

EOL can provide extra resources just when you need them. These are just some of the areas where we can help you deal with regular or ad hoc problems:

- Data destruction (on and off site) to the highest standards of security/confidentiality
- Removal and recycling or disposal of unwanted equipment
- New equipment rollout/installation
- IT delivery or relocation throughout the UK
- End of lease re-engineering and refurbishment to original specification, packaging and return delivery
- Secure short or long-term data and equipment storage in EOL's premises
- Asset reporting and management
- IT equipment cosmetically cleaned
- Supply of spare parts and components
- Short term rental (i.e. exhibitions, seminars etc.)

## **Quality-Driven Service Standards**

This is the high standard of service you can expect for every job, from a small delivery to a major implementation project:

- Full risk assessment, site survey (if required) and consultation
- Professional project management throughout
- Out-of-hours and weekend working to minimise disruption
- Integration and coordination with other suppliers and service providers
- Complete confidentiality
- Highest levels of security
- Trained, security checked, uniformed staff
- Compliance with health, safety and environmental legislation
- Transport in own fleet of liveried or unmarked vehicles
- Full all-risks goods in transit insurance

## **Moving forward**

EOL remains focused on enhancing our resources and capability in line with evolving clients' needs and changing legislative requirements.

We recognise that security is vital throughout the data lifecycle - in use, in storage and in disposal. With massive increases in data volumes and growing complexity of data legislation, effective disposal at every stage of the data management process is vital.

EOL can offer a range of on-site and deployment services that can take place in parallel with your disposal needs. This simplifies the process and gives you a single point of contact and accountability. We can also partner with IT resellers, manufacturers, leasing companies and systems integrators to extend the "single service provider" concept even further.

As our service grows, we will continue to provide our clients with the same EOL commitment to trust, security, quality and confidentiality.
