Embedded intelligence

Our service platforms fully integrate voice, data, network and mobile services

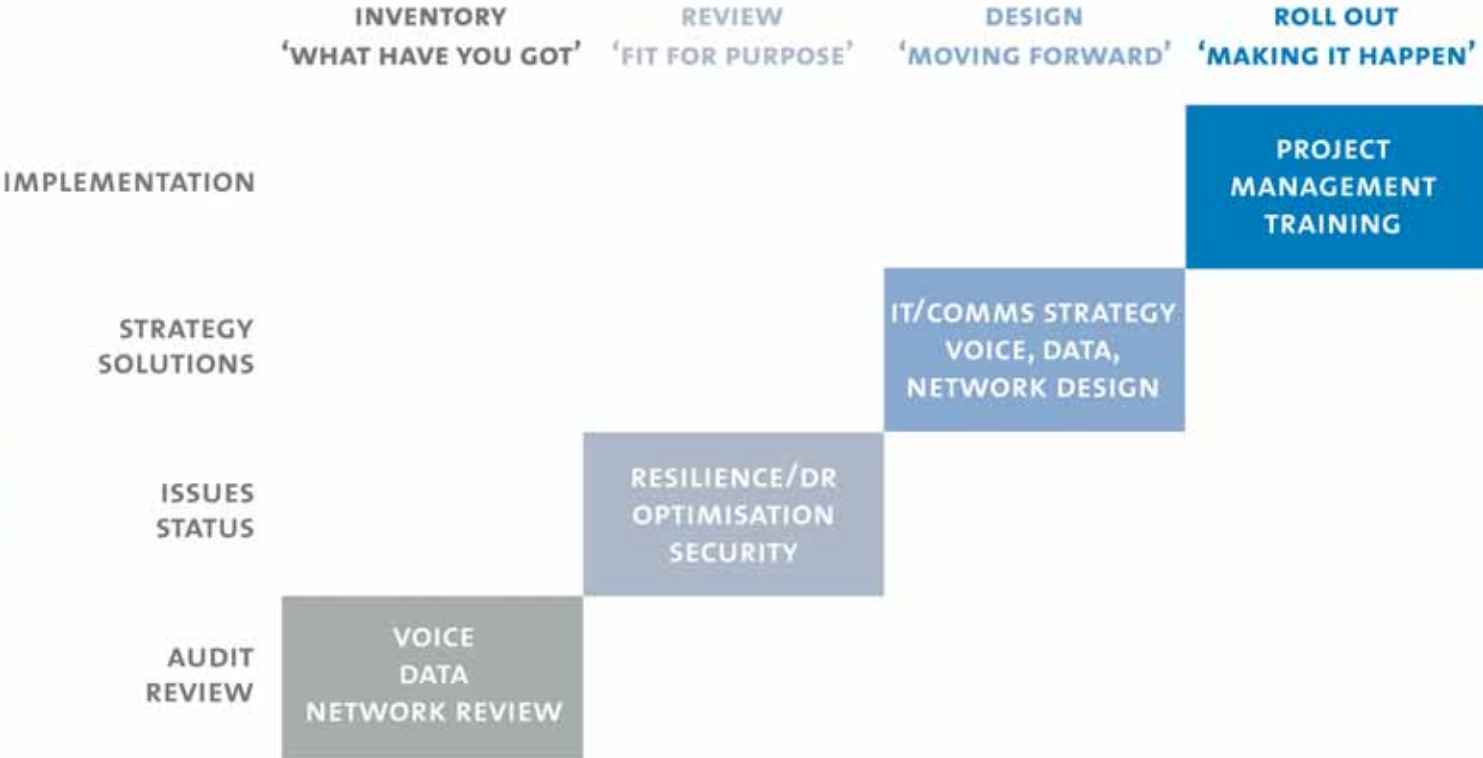

Connecting to our world takes risk, time and cost out of your business

How you benefit from our embedded intelligence

- Easy to connect to our world
- High levels of data and network security
- Transparent migration to intelligent voice and mobile services
- Scalable platforms support fast or unplanned growth
- Virtual services that are environmentally friendly
- Consistent features and experience at home, in the branch or your HQ
- Services that work together over the same connection
- Support team that can see your entire service portfolio

A self paced journey

Removing the risk of transition

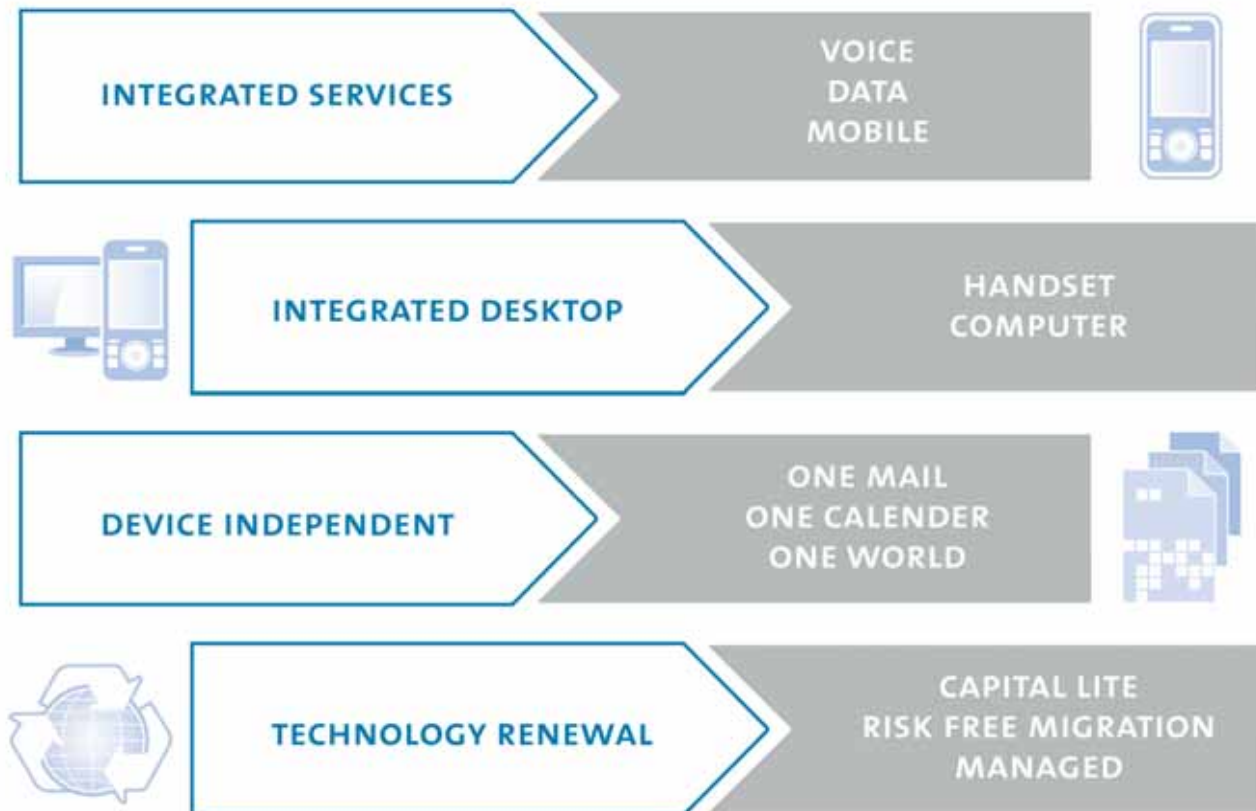

Integrated services and support

Our solutions are underpinned by standard methodologies and processes

Strategic direction

Innovative providers of integrated managed services that solve CIO's issues

Our vision...
services that are
infinitely divisible,
flexible, scalable
and not
geographically
constrained

The future Intelligent business solutions

- Information storage and retrieval by keyword
- Calls anywhere to any device (WiFi)
- Customer controls services features
- Online and highly secure
- Virtualisation
