About today's speakers

Malcolm Raggett

Malcolm trained as an engineer then lectured on the subject, specialising in hydraulics and control systems, at both further and higher education levels before moving into IT management. He was the first lecturer in his college to successfully introduce Web 1.0 technologies in support of the learning process and has been an enthusiastic supporter of the appropriate use of learning technology ever since. His current post is IT Manager at the School of Oriental and African Studies, where he has been since 1999.

Tony Jack

Tony has over 20 years experience in the IT and has worked for a number of organisations across the public, charitable and commercial sector. He is currently the Head of IT and Systems at Newham College of Further Education where he has worked for the past 3 years. Prior to joining NCFE Tony was the IT Manager at Motability and prior to that an IT Project Manager with IBM Global Services whom he joined from Barnardos the children charity. Tony started his IT career in the Home Office, within the Prison Service IT group and during that time spent 3 years implementing what might now be referred to as a Customer Relationship Management Systems within 30 or so Prison Establishments. This system still being in use some 18 years later! Tony first degree with in Geology but he soon recognised that although great fun as a subject, his inability to recognise a fossil even when he had tripped over it that his future career path might lie elsewhere. Tony enjoys hill walking and being an amateur geologists and likes to spend as much of his time as possible either in Scotland or the Lake District.

Richard Quine

Richard joined InTechnology nearly three years ago and heads up the product management team. Previous to joining InTechnology, Richard had spent 12 years at 3Com Corporation with a number of global technical and product management roles in their LAN and network management divisions.

Stefan Haase

Following appointments with a number of national and internal telecommunications business, Stefan has been working for InTechnology for the last seven years, initially as the Business Manager for Data Service and introducing the concept of Multi-Tier Data Management to the market. He is now running the InTechnology Marketing Team and driving the company's Business Services Grid strategy.
